TECHNICAL SKILLS

Languages: Java · JavaScript · TypeScript · SQL

Automation: Selenium WebDriver · TestNG · Appium · Playwright · REST Assured · Postman · JMeter

DB Testing: SQL (stored procedures, triggers, assertions) · MySQL · Data validation · Schema testing

Testing: UI · API · Mobile (Android/iOS) · Regression · Performance · Security (OWASP Top 10, Burp Suite)

CI/CD & DevOps: Jenkins · Git · GitHub · Bitbucket · Docker · AWS (EC2, Lambda) · Linux/Unix CLI

Frameworks: Node.js · Express.js · Microservices · REST APIs · Agile (Scrum)

WORK EXPERIENCE

SDET

Oct 2025 – Present

BestQ Software Pvt. Ltd. · Remote, Kolkata

- Reduced regression testing time by 40%, measured by sprint cycle reports, by designing and maintaining a **Selenium WebDriver + TestNG** UI automation framework, replacing 200+ manual test cases.
- Improved data integrity across 3 services by authoring **SQL stored procedures** and assertion scripts to validate database state, schema consistency, and business logic after each deployment.
- Expanded mobile test coverage by building **Appium**-based automation suites for Android and iOS flows, reducing manual mobile regression effort by 50%.
- Achieved zero pipeline-blocking failures over 4 months by integrating **TestNG** suites into **CI/CD pipelines** via Jenkins, with Docker-containerised execution for consistent staging results.
- Validated OWASP Top 10 risk areas (XSS, SQL injection, auth flaws) using Burp Suite, reducing security defect leakage into production.

SDET Intern

Oct 2024 – Apr 2025

GoSky Tech Softwares Pvt. Ltd. · Onsite, Kolkata · *Part-time alongside final year studies*

- Improved REST API test coverage by 35% by executing and validating functional and edge-case scenarios using **REST Assured** and Postman across microservices.
- Validated zero data loss in a legacy-to-microservices migration by writing **SQL queries and stored procedures** to assert data consistency and row-level accuracy post-migration.
- Built **Appium** test scripts for mobile regression on Android, integrating them into Jenkins pipelines and reducing manual mobile QA time by 40%.
- Automated AWS infrastructure tasks using Boto3 and Lambda, with environment state validated through **SQL assertions** on RDS instances — managed via Linux CLI.

PROJECTS

AI-Powered Resume Builder

TypeScript · Express.js · MongoDB · Gemini API

- Next.js + TypeScript app with REST APIs for dynamic resume generation; Gemini AI improved ATS compatibility by 30% across 100+ resumes. Validated API contracts and secure auth flows using Postman and REST Assured.

StudyNotion — EdTech Platform

JavaScript · React.js · Node.js · JWT Auth

- Full-stack EdTech platform supporting 500+ enrollments; designed TestNG-based regression suite covering RBAC, payment workflows, and DB-level assertions on user and transaction records.

LEADERSHIP & PROJECT OWNERSHIP

- Owned end-to-end test strategy across UI (**Selenium**), mobile (**Appium**), API, and database layers — improving release confidence and reducing escaped defects across multiple products.
- Led DB testing practice by writing and reviewing **stored procedures**, triggers, and SQL assertion scripts, ensuring data integrity across migrations and deployments.
- Drove defect lifecycle management by coordinating with developers and QA to triage, track, and verify fixes — consistently reducing re-open rates and shortening resolution cycles.
- Adapted test frameworks across monolith, microservices, and cloud-native architectures, aligning automation strategy with each project's DevOps pipeline and release cadence.

EDUCATION

B.Tech in Electronics & Communication Engineering

May 2022 – June 2025

Dr. Sudhir Chandra Sur Degree Engineering College, MAKAUT · Kolkata
