SUMMARY

SDET covering UI, API, and performance testing for web applications and microservices. Owns the Playwright and REST Assured frameworks (TypeScript and Java), builds distributed k6 load tests on Kubernetes, and keeps the suites running in Jenkins. Also designed and shipped an LLM-backed developer tool end to end.

TECHNICAL SKILLS

Test Automation: Playwright (TypeScript/Java) · Selenium WebDriver · TestNG · REST Assured · Postman · Appium · Vitest
Testing Types: Functional · Regression · Smoke · Sanity · Integration · UI · API · Mobile · Performance & Load (k6, JMeter) · End-to-end · Cross-browser
QA Process: SDLC · STLC · Test strategy & planning · Test case and scenario design · Defect lifecycle (Jira) · Agile / Scrum · Sprint ceremonies
Infrastructure & CI/CD: Docker · Kubernetes · Jenkins · AWS (EC2, Lambda) · Linux/Unix CLI · Git · GitHub · Bitbucket
Languages & Protocols: Java · TypeScript · JavaScript · SQL · Node.js · REST · gRPC · WebSocket · MySQL · PostgreSQL · Schema testing
AI-Assisted Workflow: GitHub Copilot · Claude · LLM API integration · AI-accelerated test data generation

WORK EXPERIENCE

Software Development Engineer in Test (SDET) Oct 2025 – Present
BestQ Software Pvt. Ltd. · Remote, Kolkata

- Built and maintained the Playwright/TypeScript end-to-end suite covering core product workflows: page-object architecture, reusable fixtures, parallel cross-browser runs. UI regression cycle time dropped around 30%.
- Kept the older Selenium WebDriver (Java/TestNG) suites alive and extended them through the migration, so nothing lost coverage in the handover.
- Designed distributed k6 load and spike tests on Kubernetes for transaction-heavy backend services — established capacity baselines, found the points where performance degrades, and worked with the team to trace latency and throughput regressions to their source.
- Turned manual API checks into repeatable REST Assured and Postman suites covering request/response bodies, status codes, headers, and authentication.
- Worked with developers to move the suites into Jenkins CI/CD, running on Docker-containerised runners on AWS EC2, so every build gets tested.

SDET Intern Oct 2024 – Apr 2025
GoSky Tech Softwares Pvt. Ltd. · Onsite, Kolkata

- Grew REST API coverage by roughly 35%, writing functional, negative, and edge-case scenarios in REST Assured and Postman across microservices.
- Automated UI regression with Selenium WebDriver (Java) and TestNG and wired it into Jenkins — about 40% less manual regression effort per cycle.
- Ran the suites against AWS EC2 test environments, which made it much easier to separate environment flakiness from real product defects.
- Contributed to test plans, wrote functional, regression, smoke, and sanity cases from requirements, and logged and verified defects to closure in Jira across Agile sprints.

PROJECTS

BugSnap — One-Click Bug Capture with LLM-Written Tickets
LLM API · Chrome MV3 · Node · Express · TypeScript · PostgreSQL · React · Vitest

- Integrated an LLM API that takes raw capture data — console errors, failed network calls, environment details, a screenshot — and returns a labelled, severity-rated GitHub issue. Prompts are tuned so the output structure stays consistent run to run. Manual bug write-up is gone from the reporting loop.
- Wrote 17 Vitest backend tests covering the HTTP end-to-end flow and RBAC denial cases. Tokens are encrypted with AES-256-GCM, API keys stored as SHA-256 hashes.

Multi-Protocol Performance Testing Framework
k6 · TypeScript · gRPC · WebSocket · REST · Node.js

- One tool for non-functional testing across REST, gRPC, and WebSocket: a protocol-agnostic k6 and TypeScript framework with ramping and simultaneous-barrier spike profiles, deployable as distributed runners on Kubernetes.
- End-to-end consistency assertions enforced through k6 thresholds catch cross-protocol data mismatches before they reach CI. Each run produces per-protocol Apdex scores, trace-id failure logging, and a self-contained HTML report.

EDUCATION

B.Tech in Electronics & Communication Engineering May 2022 – June 2025
Dr. Sudhir Chandra Sur Degree Engineering College, MAKAUT · Kolkata
